**One week's
Installation & Training**

CLIENT'S REQUIREMENTS

The client required a Video Conferencing Facility allowing Barristers and Clerks to communicate with colleagues in the legal profession, interview clients, interview witnesses, record expert witness statements and host proxy hearings.

The client wanted to present the impression of face-to-face meetings.
The client also wanted to have the option to record Video meetings and share digital and hard copy content.

SOLUTION PROVIDED

Rapid Technologies provided a Polycom Video Conferencing System which allowed the client high quality point to point and point to multi-point Video meetings with the added option of bringing in both digital and hard copy content.

Rapid Technologies also provided and installed the Plasma display system and training in the use of the Video Conferencing solution.

For more information on Video Conferencing visit www.rapid.co.uk

ABOUT RAPID

Rapid are one of the UK 's fastest growing technology suppliers*, due to the company's innovative approach to providing ICT solutions and Broadband services to organisations. Rapid provide specialist advice on planning, installation and network design facilities.

Established in 1985, supplying computer hardware, software and peripherals to business, education and the local community. Rapid were one of the North West 's first specialist computer dealers to have in house service and technical support departments.

Rapid have now evolved into a One-Stop-Shop for organisations wishing to improve or implement new ICT products and solutions.

Rapid have been involved in a number of high profile inner city and rural ICT projects. Their extensive knowledge in the area of project management has helped them to deliver leading edge projects within strict deadlines and budgets. Rapid's expertise in the area of Wireless, Satellite and Interactive technologies, has proved particularly useful to schools needing to deliver community-based projects, which meet the requirements for achieving Technology College status.

Rapid Technologies is a UKAS ISOQAR ISO: 9001 Quality Assured Company.

*Rapid Technologies were awarded Fast 50 recognition by Deloitte Touché, November 2002/3/4, for outstanding growth during the last 3 years trading.

**Rapid holds a Consumer Credit Licence, and as such are able to provide a range of finance options to suit their customers' purchasing requirements. These options include Finance leasing, and deferred leasing payment plans.
