Share and save

See how SMART kapp takes whiteboard working into a new dimension 

# Perfect for any environment

**Brainstorming with teams in another office? Interactive classroom session? Conference call? Remote learning?** SMART kapp lets you work and connect across remote locations — making for more effective meetings and collaboration. It's also incredibly easy to use.

## 1: Plug it in no IT integration needed

SMART kapp gives you all the walk up and use simplicity you'd expect from the industry's innovators — so you don't need to have the IT team on speed dial. Put it up. Plug it in. Start your session in seconds. It's really that easy.

## 2: Connect your device all you need is the SMART kapp app

The SMART kapp app is where the real magic happens. It lets you connect any smartphone, tablet or laptop to the board using a simple NFC tag or the QR code. So now anything you write on the board will appear on any connected Android or iOS device. Up to 250 people can be invited using the Plus app, five with the Basic app. Simple.

## 3: Start writing just like you've always done

Refined new inking innovations let you write and erase on the sleek, stain-free surface using any dry-erase board marker. Just pick up a pen and get going, the way you always have.

## 4: Share and save content perfect for secure collaboration

A URL is automatically created when you connect. Send it to anyone and they'll immediately see content updating as it's created on their device. You can also take snapshots as you work and save them in the SMART kapp app as JPEGs or PDFs to Evernote™, Google Drive™ or Dropbox™. Any content you share is immediately deleted when you disconnect from the board.
