

# Condeco Workspace Occupancy Sensors

Transform the workplace with powerful insights

---

Condeco Sense are discreet wireless sensors that measure and monitor your workspace based on heat and motion. Understanding how desks, meeting rooms, and break out spaces are used on a daily and hourly basis provides valuable insight about how your real estate is used. With Condeco Sense, you can understand how teams work, allocate space accordingly, and develop ongoing cost-saving initiatives.

---

## **Instant access to data**

Condeco Sense captures data every 15 seconds and this information can be accessed instantly via any internet-enabled device. This data provides insight to drive real estate optimization.

## **Minimal installation and running costs**

Condeco Sense delivers unparalleled ROI. The Condeco sensor solution gives you the flexibility to use on a temporary or permanent basis.

## **No impact on IT**

Sense operates on a wireless mesh network that is connected straight to the cloud, totally separate from your organization's IT network.

## **Reduce real estate costs**

The precise data helps you develop new ways of working and identify where real estate savings can be realized.

## Key Features

Small and discrete wireless occupancy sensors

Cloud-based reporting portal gives you access to data through any internet-enabled device

Low energy consumption : battery life ~ 2 years

Measures workspace, an entire floor or building, or total real estate portfolio

1400 readings per day

Suitable for all workplace settings including: workstations, meeting rooms, video conferencing rooms, and break out spaces
